

25 July 1979

NOTE FOR: Director of Logistics

FROM:

Chief, Plans and Programs Staff

SUBJECT: Comments on DDA Draft on "CIA Goals Program--FY 80"

1. There are no CIA goals oriented towards Logistics.
2. I suspect, however, that OL would in all probability be tasked to provide input in at least the personnel, training, and information handling goals of the DDA.
3. I like the DDA's idea of injecting new goals and objectives into the program as the year progresses.
4. You might select the objective on Energy Conservation from our other paper and suggest that it be given recognition as a "CIA goal for 1980."
5. As a part of the goal on Energy Conservation and the impact of the shortage of petroleum products, you might want to mention the replacement of POV's with GOV's.
